Easier, Smarter Compliance

The compliance platform designed for building managers

Xaap is a Software-as-a-Service (SaaS) solution that provides a single, centralized platform for building compliance data. With convenient online access, building managers can maintain, track, and ensure system compliance and manage their reporting needs.

Xaap Mobile Inspection Reporting Application allows inspectors to capture inspection data for building systems and generate inspection reports directly form their mobile phones.

Xaap Web Inspection Reporting Application provides you with a centralized view of all your building's system data, and historical inspection reports that you can easily view, download and share.

No matter how you handle your compliance and inspection needs, Xaap gives you the power to do your job better and more efficiently.

Key features

- Multiple inspector
- Offline mode
- Barcoding
- Gateway
- Permission structure
- Images for deficiencies
- Digital signature capture
- Inventory management
- Historical report repository
